## INTRODUCTION

Congratulations on the purchase of your new PENN Warfare reel. Each PENN Warfare reel is constructed using only the highest quality components, tapping into PENN's 75-plus years of reel building experience.

Some features found on the PENN Warfare Reels are highlighted throughout this manual. Also found in this manual are tips for basic maintenance and upkeep of your new fishing reel. On behalf of the entire company, PENN Fishing Tackle would like to thank you for the purchase of our quality fishing reel.

## WARRANTY AND NON-WARRANTY SERVICE

For non-warranty service to your PENN reel, simply return the reel with a brief note describing the service you want performed. Available on the PENN website ([www.pennfishing.com](http://www.pennfishing.com)) is a repair form that we suggest is completed and returned with each reel for more efficient processing. PENN strives to complete all repairs in a timely manner.

PENN will not initiate service until a means of payment is arranged. Accepted means of payment include only the following credit cards: Mastercard, Visa, American Express, and Discover. COD, personal checks, or cash are not accepted.

Please visit our website [www.pennfishing.com](http://www.pennfishing.com) for warranty information

## FEATURES

**Level Wind.** PENN's level wind system evenly winds line on the spool for repeated, carefree fishing. Line pays out evenly when free spooling.

**Gearing.** Marine Grade Bronze Main Gear and Precision Mechanical Brass pinion gear create an incredibly strong gearing system built for years of service and performance.

**Auto Engaging Gears.** Penn's auto engaging gear will engage automatically with full rotation of the handle when the eccentric lever is in the free spool position. Feature not available on WAR20N and WAR30.

**Stainless Steel Ball Bearings.** For unparalleled smoothness in casting, reeling and battling oversized gamefish, nothing beats precision stainless steel ball bearings.

**Aluminum Spool.** The aluminum spool is lightweight and strong, and the anodized finish provides the ultimate in corrosion resistance for season after season of hard fishing. 3 Rings denote 1/3, 2/3 and Full Line Capacities.

**Handle.** The handle provides a secure grip, even when hands are wet. Convertible for extended or compact lengths.

**Other Quality Features.** Aluminum reel stand and a molded-graphite, one-piece rod clamp combine for an extra measure of strength and security of joining reel to rod.

## CARE AND LUBRICATION

Your PENN Reel is quality manufactured for maximum durability. Like any other precision-made piece of equipment, reasonable care will ensure peak performance and longevity.

After each fishing trip, the reel should be cleaned with a soap solution and fresh water, preferably warm, to remove any accumulated salt deposits.

When washing the reel, use caution not to use a driving force of water, since the water pressure will force salt deposits and/or sand into the reel. A very fine spray will help dissolve the salt on the external parts of the reel and rinse from the reel.

Dry excess moisture from the reel and then sparingly lubricate all exposed areas. A good practice is to spray a rag with a pressurized spray lubricant and wipe down the reels with the rag. Your reel should be stored in a cool, dry place. Do not store in a plastic bag, as condensation may develop.

Periodically examine your reel and tighten loose screws and fittings. Depending upon use, your reel should be overhauled at least once every season.

Frictional points in the reel should be frequently lubricated, and for best results use PENN lubricant. PENN's lube is the right formula, designed specifically for PENN Reels. Keep in mind, that a few drops of oil is usually sufficient.

Major points for external lubrication include: Handle knob, eccentric lever, clicker button, and level wind.
