	-----			57A	57A-750	1183942	METAL KEYED WASHER (1 REQ.)

Biggest noticeable difference in the 2014 black/gold reels is the rotor cup goes back to the way the old green ones were, all smooth metal with no indent for the decals. It does not use rotor decals.

NOTE: Many of www.pennparts.com schematics include changes that were either made by Penn, or errors found and corrected by our parts dept.
SBT Ver. 050314 (based on Penn's Rev 10 3-20-14)

Per Penn's 1989 schematic of the 704Z:

Note to owners of Penn Green series of Spinfishers.
All parts are interchangeable between the Green Series and the New Z series except parts 1, 15, 27, 45, 47, 52."

TRANSLATION: 1, 15, 27, 45, and 52 were just differences in cosmetics - newer parts fit but are black. Only on 47- Spool does the difference become a problem, as the newer clicker does not seat the same. If you don't care about having the clicker, this isn't an issue. There is a photo page in this .pdf file to show how to modify a click tongue to work as a sub.
