## WARNING!

The tab on this housing plate cannot be accessed to remove the plate, without removing the spool/rotor from the reel.

The screw that holds it in place is covered. Trying to remove the housing plate after taking out only the three outer screws can result in breaking the housing plate.

NOTE: Many of [www.pennparts.com](http://www.pennparts.com) schematics include changes that were either made by Penn, or errors found and corrected by our parts dept.

SBT Ver. 053109 (based on Penn's Rev.7/18/08)

NOTE: BOTH THE ROTOR NUT AND THE HANDLE COLLAR  
**HAVE REVERSE THREADS**  
INSTALL BY TURNING COUNTER-CLOCKWISE

NOTE: There are a set of two pieces that were not shown on the original Penn schematic and parts list at all. There are a spring and ball balanced underneath the end of bail wire on the opposite side from the roller snugged between the round attachment and the rotor cup. They function to keep the bail wire from standing completely upright, it will instead flip either one way or the other.

We assigned them numbers:

32A-8000CV Bail Stabilizing Spring

32B-8000CV Bail Stabilizing Ball

We do not at this time know if Penn will make this a serviceable part number.
