OPTIONAL MODDING:

If desired, anywhere in the reel that the 43L bushing is used, you could sub to the 43H ball bearing, they are the same measurements and thickness.
Or you could intermix 43L and 43H in any grouping, but it is recommended that you keep a 43H in the 43H location.
SSVi5500LC, SSVi6500LC and SSVi7500LC reels

should I add modding notes to the 43h and 43l screens online and cross link them?

FOUND IN ALL THE SSVi LC MODELS BUT NOT ON REV 0 OR REV 01

43S**	??	43S-SSVi5500LC	SHIM, EARRED SHIM (VARYING QTY IN THE REELS) ** NOT ON ON ORIG SCHEMATICS, FOUND UNDER THE 43J U-shaped collar (SOME REELS HAD NONE AT ALL OR JUST 1)
27H**			Unlike the 6500LC and 7500LC sizes, this rotor does NOT have a separate 27H graphite top, the 27-SSVi5500LC is all one piece
