OPTIONAL MODDING:

If desired, anywhere in the reel that the 43L bushing is used, you could sub to the 43H ball bearing, they are the same measurements and thickness.
Or you could intermix 43L and 43H in any grouping, but it is recommended that you keep a 43H in the 43H location.
SSVi5500LC, SSVi6500LC and SSVi7500LC reels
should I add modding notes to the 43h and 43l screens online and cross link them?
