NOTE: Many of [www.pennparts.com](http://www.pennparts.com) schematics include changes that were either made by Penn, or errors found and corrected by our parts dept.  
SBT Ver. 070415

Change: Older reels prior to 1953 used the 14-60 bent copper dog spring.  
After 1953, this changed to the current 14-99 coiled dog spring.

### CLICKER RELATED NOTES/PART CHANGE INFO

#### INSTALLATION:

To replace the click tongue on models where it is peened into place, use a dremel drill with a fine tip to remove the old click tongue and click button. Then peen the new 36-209 into place.

#### OPTIONAL:

Any reel that uses the 36-209 button can use:

36N-209 button and a 69B-600 removable c clip

This newer style is held by the clip instead of being peened in place.
