

# 6/0 Senator 114 with posts

Older reels had drags accessible from outside the reel, using the 140 felt washer and the 136 collar/cap. Those older reels did not have a 9 collar or the 8A washer between the 9 and the star drag.

Example of older, thicker drag washer stack from the 1940's

When converting to the thinner HT100 drag stack which has more washers, an extra metal washer may be required to fill in possible excess space in the older side plate.
